## Summary

I have more than 11 years of experience in building large scalable web and mobile applications to make our life easy. I have build one of the payment gateway services through that million of users can buy the products, top-up, bill pay and submit online application form payment through web or mobile application. Now i am working to build wallet system where integrate all the latest security method to ensure people to use the wallet system. Also Build mobile application to monitor agents activity analysis for the Trust Bank paypoint. I am not only build large finance app also build one of the largest job portal, blog portal and ERP system in Bangladesh.

As i have to deal with million of users through the application that's why i grow my expertise on cutting edge web scalable, web security, server maintenance and Big Data like Hadoop, Apache Spark. During this period i have to work on multiple platform to build the different different apps like : [ASP.Net](#), C#, PHP, JAVA, MYSQL, SQL, Oracle, Hadoop, SSL, TLS.

I am a passionate and self motivated person who loves to hack new stuffs. I'm a team player, I love learning from and sharing with others. In my leisure i contribute with open source technology and participate local IT community based conference.
